CC: Juha-Markku Leppänen <Juha-Markku.Leppanen@helcom.fi>

Dear Mr. Bartnicki,

please refer to the report entitled: "Atmospheric supply of Nitrogen, Lead, Cadmium, Mercury and Lindane to the Baltic Sea in 2003" and find the Polish remark to the chapter 5.5 table 5.6. Annunal Pb concentration measured in precipitation on the Leba station (PL04) differs from the value presented in the table. The misleading value of 2,03 g/dm³ should be replaced by the correct value of 1,08 g/dm³.

best regards

Anna Bakierowska
